

Complexity creates stress.

The solution: *abilis all-in-one!*

Having only **one** device to care for is the best way to reduce complexity.

Autonomous connectivity, telephony and automation.

This is Abilis.

Why choose **abilis**?

You have too many devices or cloud instances to care for.

You need to add networking and automation in your product or system, and don't know how to manage the required complexity.

What we will provide you is the following scenario:

One single number to call in case of need. You or your engineer will be **able** to do the rest.

ALL in one?

abilis "SDK"

Abilis contains a large set of **networking**, **phone/pbx**, and **building automation** features.

Use those features, "**off-the-shelf**" for your company or your customer's

or

Use abilis as a **hardware platform** to develop **your product**, **your service**, or **your special process**.

■ Customizable Solutions

Craft your custom configuration. **replicate it N times.**

■ High Integration

Combine a vast array of telecommunications and automation features. These features interact with each other and are scriptable.

■ Operational Efficiency

Adopt one single **predictable** device, that will evolve with your systems for many years!

■ Savings

Less energy consumption, less things to do and to learn. Less dependencies!
